

## CORPORATE PROFILE

XPO Logistics (NYSE: XPO) is a top ten global logistics company. We run our business as one, highly integrated network of people, technology and physical assets in 32 countries, with over 95,000 employees and 1,466 locations. We use our network to help customers manage their goods more efficiently throughout their supply chains.

Our company has two reporting segments: transportation and logistics. Within these segments, our business is well diversified by geographies, verticals and types of service. Most important, we've hired top shelf talent – seasoned operators and executives who know how to help our more than 50,000 customers improve productivity and reduce costs.

In our logistics segment, we provide a range of supply chain services, including highly engineered solutions and high-value-add contract logistics. We perform e-commerce fulfillment, reverse logistics, factory and aftermarket support, packaging and labeling, distribution and managed transportation. In our transportation segment, we provide truckload, freight brokerage, last mile, expedite, intermodal, drayage, less-than-truckload and global forwarding services. We have a strong franchise in each of our service offerings, including leading positions in fast-growing areas such as e-fulfillment.

As companies increasingly turn to XPO for supply chain solutions, we empower our employees to deliver world-class customer service through our information technology. We have a global team of over 1,700 IT professionals who understand how to drive innovation for the benefit of our customers. We've built a highly scalable and integrated platform using on-cloud technology that differentiates XPO across all lines of business and enables rapid development.

Today, XPO Logistics is on the radar in every industry that requires transportation or logistics. The potential for growth is dramatic: we have a \$1 trillion addressable opportunity, of which we hold less than 2% market share. We're working closely with customers to look at their entire supply chains, from point of origin to the end-consumer, to identify the opportunities. This collaborative approach is a major reason why customers trust us with an average of 160,000 shipments and over seven billion inventory units every day.
